

KS5 SLD and PMLD Curriculum overview – Learning for life

We aim to provide a holistic programme of study for young people with learning experiences that are challenging, relevant and fun whilst supporting individual progression and preparation for adulthood.

Our programme is underpinned by the principle that in order for learning to take place, all physical, medical, sensory and social needs are met within a fully inclusive community provision and that opportunities to grow in confidence and self-esteem are abundant, without the fear of failure.

At Mayfield College we use a range of learning methods and resources which utilise links with other professionals, agencies and the community to ensure students achieve improved outcomes. The curriculum offer is in line with the 21st Century Skills of Communication, Basic Living skills, Creativity, Citizenship and Work Related Working, Digital Literacy and computing and Personal Development Leisure and Exercise.

The areas outlined above are taught both in the classroom and, more importantly, in real life contexts, for example on work placements or in the college. Progress in Maths and English and Information Technology are embedded into the student's learning programme.

The college provides person centred programmes and pathways and is committed to working with students, families, and multi-disciplinary agencies including partners from social care and health to establish appropriate progression routes when students leave.

The aims of the College are to:

- Prepare young people for adulthood with high aspirations for a fulfilling adult life
- Provide individual pathways suited to the needs of each young person and based on their education, care and health plan
- Promote student and family choice
- Provide opportunities to gain nationally recognised qualifications where appropriate
- Support students and their families through the transition years
- Encourage students to have life experiences
- Simulate the post 16 market so that young people get a job and experience a full life and by doing so setting an example for all
- Develop a shared vision across all partners including education, local business, health and social care with families and young people at its heart and focus on improving life chances

Good Health Safe Friends Family Being a part of something A voice Opportunities for further learning and employment Independence and choice in my home

Pupils will follow a personalised curriculum based on their ILP targets and incorporating health care plans.

PMLD

Pupils will follow a curriculum responsive to their sensory needs. The focus will be on developing their ability to engage with and tolerate an increasing range of people, activities and environments.

ENGAGEMENT

Pupils will follow a curriculum which will increasingly focus on the development and application of functional skills.

This builds on the Independent Living provision. The aspiration for pupils on this pathway is that they will gain some form of employment in the future. As part of this pupils on this pathway may prepare for and take externally set assignments to gain qualifications.

EMPLOYABILITY

Curriculum areas and strands

	Communication - English	Basic living skills (Critical thinking and problem solving) - Maths	Creativity	Citizenship and WRL	Technology and computing (Digital literacy)	Leisure and exercise (Personal development)
